MULTIMATCH 3 CONNECT

CRI+ LED work light with CCT SCAN for all 18 V/20 V battery packs

ORIGINAL SCANGRIP
SINCE 1906

The powerful MULTIMATCH 3 CONNECT work light provides up to 3000 lumen and made for inspecting large surfaces during polishing, painting, cleaning operations, and color matching.

MULTIMATCH 3 CONNECT is compatible with all 18 V/ 20 V battery packs from leading power tool brands by using the SCANGRIP CONNECTOR. In addition, the POWER SUPPLY CONNECT can be used for direct power providing unlimited availability to light.

The work light has a unique CCT SCAN function that helps you find the ideal colour temperature for your task. This function allows the light to sweep through the entire colour temperature spectrum (2500K to 6500K), and can be locked when the optimal temperature is found. This guarantees accurate colour matching and paint defect detection. The 5-step dimmer also lets you adjust the light to five different levels.

With the BLUETOOTH lighting control app, you can control and adjust both the light output and the colour temperatures, providing convenience and flexibility in managing your lighting setup.

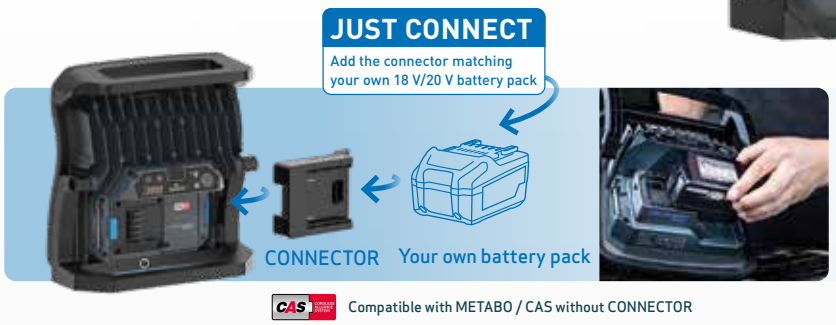

Purchase accessories separately to enhance the functionality of the work light. The SCANGRIP DIFFUSER 03.5750 effectively softens the light and prevents harsh shadows. The SCANGRIP WHEELSTAND 03.5682 enables you to conveniently move the light to any desired location and even add a secondary work light for illuminating from below.

// PLEASE NOTE: Battery pack, CONNECTOR and power supply are not included in the box
